# Pharmacokinetic Services

Discovery and Development Support for Pharma, Biotech, and CROs

Service Highlights

NCA PK analyses

Full traceability at all stages

Rapid reports

GLP and Part 11 Compliant

Key Advantages

Speed

☑ Fast turnaround of analyses and reports

☑ Decision support tool eliminates time-consuming PK analysis mistakes

☑ Flexible and fast loading of concentration data. Use Excel, CSV, or a LIMS API

Value of Services

Reliability
Accurate, reproducible, compliant

Transparency
Documented data interpretations
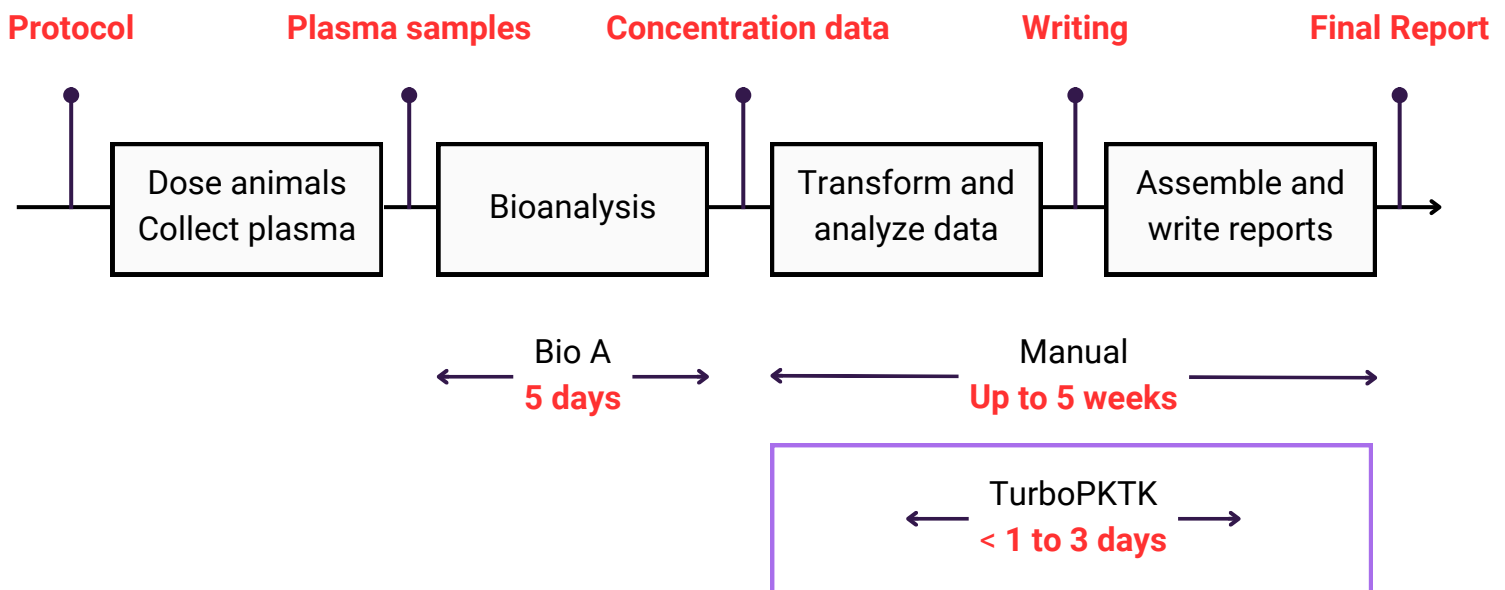

Capacity
Automation increases your bandwidth

Quality

☑ Receive DocuSign reports in the format you prefer for tables, graphs, and text

☑ Issues detected and flagged by our system are addressed by scientists and reported

☑ Validated software and SOP-driven processes comply with GLP and Part 11

Workflow

- Load Concentration Data: Excel, CSV or LIMS APIs.
- Software conducts PK analyses and flags common PKTK data issues for scientists.
- Scientist interprets study results and resolves flagged data issues.
- Software assembles and writes draft report. Tables, graphs, and written text are configurable.
- Scientist finalizes report after final review. Optional: DocuSign signatures.

Protocol	Plasma samples	Concentration data	Writing	Final Report
Dose animals Collect plasma	Bioanalysis	Transform and analyze data	Assemble and write reports	

Bio A
5 days

Manual
Up to 5 weeks

TurboPKTK
< 1 to 3 days

Benefits

- Save Time. Draft PKTK reports often available within 1 business day of BioA data.
- Increase your capacity. Decrease your backlog. Share the workload with us.
- Simplify and harmonize reporting across sites.
- Robust reports with high caliber graphs, tables, and text. Reports are fully configurable.
- This is a validated service that is GLP and Part 11 compliant.
